

TIPS FOR THE ASUS RATER AND EVALUATOR USE ONLY SECTIONS

Evaluator Use Only Section: You, the test-giver will use the “Evaluator Use Only” section to cross reference all of your materials (LSI, drug/alcohol assessments, past PSI reports, interview notes, etc.) related to the client’s drug/alcohol use. Then YOU, as the evaluator, score the client’s involvement, disruption, and readiness to change. You are to subjectively rate the individual with your ‘gut hunch’ as to where this person really scores

ASUS RATER (front page): Add together the first two items in the “Evaluator Use Only” box on the front page (Use Involvement and Use Disruption). If your rating does not align with the ASUS, this could mean the client is defensive/deceptive and more probing may be needed.

INFORMATION AND INSTRUCTIONS ON THE USE OF THIS SURVEY

This booklet contains questions about how you see yourself. Some questions have to do with your feelings and emotions. Others have to do with the use of alcohol and drugs. Be as honest as you can when completing the survey. This will help those working with you to better understand your concerns and questions and your use of alcohol and other drugs. For each question in the survey, circle the letter under the question that best fits you. Please answer every question and give only one answer to each question. After you complete the survey, your counselor will provide you with a computer printout that compares your scores with the answers provided by more than 2400 adult probationers. Your counselor will review the ASUS report with you to answer any questions and explain the results. **You may now turn the page and begin the survey.**
